01 Overview & Quick Facts

STARIA is Hyundai Kenya's large MPV answer for buyers who need more passenger room than a normal SUV. Hyundai's local material describes a 2.2-litre diesel, 9- or 11-seat global layouts, six-speed manual or eight-speed automatic transmissions and a strong torque output. The Kenya quotation must identify which seating and gearbox combination is actually supplied. For STARIA 2.2D Automatic, the local specification identifies engine 2.2-litre turbo-diesel, displacement 2199 cc, power 130 kW, torque 431 Nm, transmission 8-Speed Automatic, drive layout Front-wheel drive. The Kenya listing places this mpv in a diesel part of the Hyundai range. The available local derivative names are STARIA 2.2D Automatic. Those names matter because a gearbox, wheel package, drive layout or seating arrangement can change the way a vehicle works on the same road. Where the local page does not publish a precision number, the sensible buyer response is a written question to the authorised distributor, not a number borrowed from a different country. It suits a family shuttle, hotel, school, tour operator or large household that uses passenger capacity every week. The body is large,...

Buyer Summary

"STARIA is the right Hyundai when passenger capacity and access dominate the brief."

STARIA is the right Hyundai when passenger capacity and access dominate the brief. Its value depends on the local seat count, gearbox, service support and the operator's ability to use a large MPV every day. The decision is strongest when the exact STARIA derivative, local equipment, price and support package all match the owner's route. A different grade may be better value even when it carries fewer visual extras, while a larger vehicle may be wasteful if its capacity is rarely used. That is a practical conclusion rather than a universal ranking.

City Driving	STARIA's town test should focus on door operation, passenger access, mirror visibility and parking cameras. The sliding-door benefit only matters if the route has enough side clearance. Sit in every row and check ventilation, luggage and child-seat access in the actual local configuration. The STARIA should be driven through a normal weekday rather than judged from a quiet dealership loop. Check visibility, access, parking, climate control, storage and the exact safety equipment fitted to the quoted mpv. A short route should include the awkward turn, speed hump, ramp or loading point that normally exposes a vehicle's weak point. If it cannot be tested at the dealership, ask for a second drive or make the question part of the purchase record.
Highway	The 2.2 diesel and automatic option make STARIA a natural intercity people mover, but a full cabin changes braking and fuel use. Drive with representative passengers, test a climb and check the service interval. The exact 9- or 11-seat layout affects the luggage compromise, so it belongs in the quote. Use the expected passengers and luggage when judging the STARIA on an open road. Engine response, gearbox behaviour, braking, seat support, tyre noise and fuel planning are linked to load and speed, so an empty vehicle can give a misleading impression. The most useful result is a route-specific decision: how often the vehicle will travel, where fuel or charging stops are available, and which service support is reachable when the trip is finished.
Off-Road	STARIA is an MPV rather than an off-road vehicle. Its height can help on ordinary access roads, but the large body, tyres and passenger load demand care on rough surfaces. Route planning and safe loading are more important than a raised driving position. Published clearance or four-wheel-drive equipment should be read alongside tyres, wheel size, payload and driver skill. The STARIA cannot be made into a different vehicle by optimistic wording, and a wet road can expose limitations that a dry launch event hides. For occasional rough access, moderate speed and sensible line choice may be enough. For regular remote work, the buyer should budget for recovery equipment, tyre protection and a service plan that supports the route.

Best For

It suits a family shuttle, hotel, school, tour operator or large household that uses passenger capacity every week. The body is large, so a driver should measure the loading zone, roof height and turning space. Buyers who need seven seats but rarely carry more should compare a normal SUV before taking on MPV size.

04 Variant Comparison Matrix

All 1 variants of the Hyundai STARIA side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.

SPEC	STARIA 2.2D Automatic
Price (ex-showroom)	KES 8,950,000
