01 Overview & Quick Facts

The BMW 4 Series Coupé is the range's larger two-door grand-touring shape, positioned above the compact 2 Series Coupé and below the uncompromising role of a full M4. Its G22 body combines a long bonnet, low roof, two substantial doors and a separate luggage compartment. South African buyers can choose a regular petrol, a regular diesel and an M Performance six-cylinder flagship. That structure becomes easy to understand when the body decision comes first: buyers need to value two-door style and front-seat priority enough to accept difficult rear access. BMW 420i Coupé M Sport is the entry petrol derivative, using 135 kW and 300 Nm through an eight-speed automatic. BMW 420d Coupé M Sport adds the distance-oriented diesel alternative with 140 kW and 400 Nm. M440i xDrive Coupé is mechanically distinct, pairing a six-cylinder petrol engine with 285 kW, 500 Nm and all-wheel drive. The first two share an M Sport equipment theme but solve different trip patterns. M440i introduces a much faster, more expensive ownership proposition without crossing into the M4's full-M chassis and engine identity. The petrol 420i...

Hagalu Editorial Verdict

"An elegant two-door touring BMW whose petrol, diesel and six-cylinder choices reward honest use-case planning."

The 4 Series Coupé provides a rare three-way engine choice inside one recognisably two-door body. The 420i is balanced, the 420d is a distance tool and M440i xDrive is a genuine performance flagship. Its greatest strengths—low roof, long doors and front-seat focus—are also its everyday compromises. Buyers who test rear entry, parking width, boot shape and wheel comfort can enjoy a coherent grand tourer. Those needing routine family access will find the Gran Coupé more convincing, and performance seekers wanting full-M hardware need to compare M4 on its much higher ownership demands.

City Driving	Its road footprint is manageable, but long doors and limited rear visibility need care in tight bays. The 420i is the natural urban choice among the regular engines. A 420d owner needs enough longer running to support diesel, while M440i performance requires restraint in wet congestion. Test ramp angles, camera coverage and wheel comfort around familiar potholes. Enter the rear seat in a narrow space and decide whether that task will remain acceptable after the novelty fades. Confirm where a passenger can safely wait while the front seat moves.
Highway	The Coupé is at home on flowing tar. 420d offers strong torque and a convincing distance role; 420i supports measured overtaking without M440i cost; M440i makes acceleration effortless but places greater emphasis on tyre condition and speed discipline. Test front-seat support, cabin noise and actual luggage. Rear passengers must complete a long route before being described as regular occupants. Confirm the mobility solution and tyre replacement availability for travel beyond major centres, and check whether the selected wheel preserves the ride expected of a grand tourer.
Off-Road	No 4 Series Coupé derivative is designed for trails. M440i xDrive is an all-weather road-performance system, not a substitute for clearance, low range or underbody protection. A smooth gravel approach can be negotiated carefully after checking tyre sidewalls and loose stones. Corrugations, ruts and water crossings expose lower bodywork and costly wheels. Owners reaching remote estates frequently need to reassess the body choice rather than expecting electronic traction to solve physical clearance.
Best For	The 4 Series Coupé suits an individual or couple wanting a refined two-door car for commuting and touring, with rear seats used occasionally. 420i serves mixed mileage, 420d rewards sustained distance and M440i xDrive is for buyers deliberately wanting six-cylinder performance. Families needing routine rear access, bulky cargo flexibility or high ground clearance need another body.
