01 Overview & Quick Facts

The live South African table states 85 kW and 290 Nm from a permanent-magnet synchronous motor, with a lithium-iron-phosphate battery labelled 50 kWh. The body measures 5,320 mm by 1,695 mm by 1,990 mm on a 3,050 mm wheelbase and has seven cubic metres of listed load space, dual sliding doors and two seats. Battery and motor cover is listed as five years/200,000 km, with three years/100,000 km on the balance and five years of roadside assistance. A 195 km published claim is not a promise of 195 km under payload, heat, air conditioning, gradients and repeated stops. The R850,000 price must be compared with fuel, maintenance, charging hardware, demand tariffs, downtime and residual assumptions over the same ownership period as a diesel alternative. Seven cubic metres describes volume, not legal payload, so mass remains a separate gate. Ask Foton to state whether 50 kWh is gross or usable and identify the range cycle. Confirm AC inlet power, DC maximum, connector, cable, battery thermal strategy, payload, GVM and degradation warranty conditions. Do not plan the final kilometres of a shift…

Body Style	Two-seat electric panel van
Launched	2024
Generation	Low-roof, long-wheelbase electric View cargo configuration with dual sliding side doors.
Fuel Types	Electric
Colours	Exterior colour availability is not specified.

03 Pros, Cons & Buyer Summary

● STRENGTHS

- ✓ Body style: Panel Van
- ✓ Fuel type: Electric
- ✓ South African price: R850,000
- ✓ Engine: Single-motor battery-electric powertrain
- ✓ Power output: 85 kW
- ✓ Battery Capacity: 50

● CONSIDERATIONS

- ✗ Exact equipment for eView Panel Van can vary by derivative.
- ✗ Real fuel use for eView Panel Van depends on route, load and weather.
- ✗ The written eView Panel Van quotation should be checked before purchase.
- ✗ Tyre, insurance and service costs need a separate eView Panel Van budget.
- ✗ A short eView Panel Van test drive cannot represent every ownership route.
- ✗ eView Panel Van capability should not be inferred from body styling alone.

Hagalu Editorial Verdict

> *"eView Panel Van deserves a closer look when its price, equipment and powertrain fit the owner's route."*

The eView suits a closed delivery loop where seven cubic metres matters more than maximum distance. Seven cubic metres and dual sliding doors suit parcel, service or urban distribution work, while the 195 km claim requires a measured reserve for payload, weather and diversions. A fair review of eView Panel Van should end with the owner's route, not a universal verdict. The combination of a listed wheelbase of 3050, the 2024 model year and the Low-roof, long-wheelbase electric View cargo configuration with dual sliding side doors generation can be valuable for the right driver

City Driving	A site electrical assessment should cover supply capacity, protection, charger placement, load management, backup and overnight dwell. The urban test for eView Panel Van should resemble the owner's route: a cold start, queues, kerbs, a narrow turn and a place where people or goods must be loaded. The vehicle's the 2024 model year is only useful if access and visibility work in practice
Highway	For highway buyers, the eView Panel Van needs to make sense when passengers, luggage or work equipment are aboard. Local history of. Current South African eView Panel Van range, with no separate facelift identified helps frame the vehicle's intended workload; do not assume that a larger body automatically brings more reserve or comfort
Off-Road	Battery location, loaded clearance, tyre load and underbody protection must be confirmed before repeated rough access. The Low-roof, long-wheelbase electric View cargo configuration with dual sliding side doors generation may help, but neither a tall bonnet nor electric alone creates four-wheel drive, low range or a published wading ability. Ground clearance is only one part of the rough-road answer for eView Panel Van. For eView Panel Van, the sensible check is the exact confirmed driven wheels arrangement, tyre specification, load and protection underneath. Stay cautious where the local data does not state clearance or wading depth for eView Panel Van. A buyer whose routine includes construction tracks or isolated farm roads should compare a vehicle with documented capability rather than infer it from styling for eView Panel Van

Best For	Depot fleets can exploit overnight charging and predictable loops, but only after measuring energy use with the normal body load. The best buyer for eView Panel Van can describe a recurring reason for choosing its panel van layout. Then compare a listed electric range of 195 km and warranty of Battery and electric motor: 5 years / 200,000 km; roadside assistance 5 years with insurance, tyres, maintenance and the monthly finance payment

04 Variant Comparison Matrix
