01 Overview & Quick Facts

Foton's Miler is sold in four current forms: Chassis Cab at R339,900, Dropside at R359,900, Box Body at R399,900 and Refrigerator Body at R559,900. The live page lists a 2.0-litre turbo-diesel with 92 kW and 320 Nm, paired with a five-speed ZF manual gearbox. Chassis dimensions are 5,535 mm by 1,970 mm by 2,110 mm on a 2,900 mm wheelbase. Technical data show a 4,495 kg gross combination mass, 2,120 kg curb weight and 2,180 kg load weight, although buyers should confirm body-specific registered masses because fitted structures change weight. The page currently headlines a five-year/200,000 km warranty and five years of roadside assistance, with service plans available. Miler is not one proposition repeated four times. Chassis Cab is a conversion base and should not receive cargo-volume claims before a body is engineered. Dropside favours open access and irregular loads. Box Body prioritises containment, branding and weather protection. Refrigerator Body adds a temperature-control mission and a R160,000 premium over the box. The correct comparison therefore includes body mass, aperture, internal dimensions, insulation, refrigeration performance, power source, certification, warranty and repair...

Body Style	Single-row light commercial truck
Launched	2024
Generation	Single-row cab platform on a 2,900 mm wheelbase with four body configurations in the live local range.
Fuel Types	Diesel
Colours	Exterior colour availability is not specified.
OEM Website	https://fotonsa.co.za/new-models/miler/

03 Pros, Cons & Buyer Summary

● STRENGTHS ✓ Four officially priced body configurations ✓ 92 kW and 320 Nm diesel output ✓ Five-speed ZF manual identified ✓ Chassis Cab supports specialist conversions ✓ Factory-listed refrigerated option ✓ Current page headlines five-year/200,000 km warranty	● CONSIDERATIONS ✗ Generic load weight cannot safely cover every body ✗ Service plans are optional ✗ Foton publishes no official consumption figure ✗ Manual transmission only ✗ Body and refrigeration warranties require separate checking ✗ Chassis Cab needs completion engineering before work
--	--

Hagalu Editorial Verdict

"Miler's appeal lies in four factory-listed jobs, but body-specific mass and warranty paperwork decide whether each one works."

The Miler is strongest as a configurable commercial platform with a known 92 kW/320 Nm diesel and four officially priced bodies. Chassis Cab offers design freedom, Dropside offers access, Box Body offers security and Refrigerator Body offers a temperature-controlled starting point. The widening price steps are meaningful only when conversion, payload and downtime are costed. Buyers should treat every body as its own asset and demand registered masses, dimensions and warranty responsibility in writing. Choose by the cargo's handling, security and temperature needs; a monthly payment comparison cannot substitute for a body-specific operating plan.

City Driving	The short 2,900 mm wheelbase helps a commercial truck, but body overhang and width still determine access. Dropsides work well where loading comes from the side; boxes and refrigerated bodies need rear-door staging and height checks. The manual gearbox and three-place cab should be tested by actual drivers. Air conditioning, Bluetooth and electric windows are useful during multi-stop shifts, although each item should be confirmed on the exact body derivative.
Highway	The 92 kW, 320 Nm diesel and five-speed manual should be assessed at the intended body mass. A tall box or insulated body has different wind sensitivity and fuel demand from an unbodied chassis or low dropside. Foton does not publish an official consumption value for this derivative, so measure a representative route. Check tyre ratings, speed governance, service intervals and driver-rest requirements. The generic maximum speed does not substitute for safe laden performance.
Off-Road	Rear leaf springs and commercial tyres support load work, not an off-road claim. Construction or farm access must be checked against body overhang, loaded clearance, traction and surface strength. A refrigerator body also carries vulnerable equipment and insulation that should not be exposed casually to severe tracks. Route the vehicle to preserve cargo and body integrity rather than testing ground-clearance limits.

Best For

Miler is for a business that knows what its cargo requires before choosing the truck. Chassis Cab suits a professionally engineered conversion; Dropside supports open access; Box Body secures dry freight; Refrigerator Body starts a cold-chain solution. Those uses are not interchangeable, even though the cab, diesel output and five-speed ZF manual are shared. A buyer should involve the body builder, insurer and maintenance provider early, then confirm finished mass and axle limits. Refrigerated work adds temperature performance and backup obligations that justify close scrutiny of the large price premium. Companies needing only a compact petrol carrier may find Truckmate cheaper and simpler, while Miler earns its place through body flexibility.

04 Variant Comparison Matrix

All 4 variants of the Foton Miler side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.
