01 Overview & Quick Facts

The Honda Amaze is a current South African Sedan positioned for drivers who prefer a booted car with composed road manners and clear ownership costs. It is represented locally by 3 confirmed derivatives. Confirmed South African pricing runs from R254 900 to R289 900, so the range covers both the cost-sensitive entry decision and the better-equipped upper grades. That makes it useful to read the range as a real buying ladder, not just as one badge on a showroom menu. The South African range uses Petrol power with Manual and Automatic choices. Available engine references include 1.2L i-VTEC Petrol. The published output picture lists power figures around 66 kW and torque figures around 110 Nm. Drivetrain coverage includes 4x2, which is important when separating daily commuter trims from rough-road or load-focused derivatives. The derivative walk is central to the buying decision. Confirmed local versions include 1.2 Trend Manual, 1.2 Comfort Manual, and 1.2 Comfort CVT. The lower grades make sense for buyers who want the body style and warranty position at the lowest realistic monthly cost, while the higher grades...

Body Style	Sedan

Durban	ZAR 267,349
Pretoria	ZAR 268,153

* On-road prices are estimates including registration, road tax and insurance.

03 Pros, Cons & Expert Verdict

<p>● STRENGTHS</p> <ul style="list-style-type: none"> ✓ Clear local range structure ✓ Confirmed South African variant coverage ✓ Useful price ladder for comparison ✓ Powertrain choices documented by derivative ✓ Practical body format for its segment ✓ Ownership cover can be compared by trim 	<p>● CONSIDERATIONS</p> <ul style="list-style-type: none"> ✗ Best value depends heavily on trim choice ✗ Upper grades need careful price justification ✗ Some equipment can vary by derivative ✗ Real-world fuel use depends on load and route ✗ Tyre and insurance costs should be checked ✗ Not every version suits rough-road work
--	--

Expert Verdict

"Honda Amaze is strongest when the chosen derivative matches the buyer's real Sedan use case."

The Honda Amaze is not a one-line recommendation; it is a range that needs to be matched carefully to the buyer. Confirmed South African pricing runs from R254 900 to R289 900, so the range covers both the cost-sensitive entry decision and the better-equipped upper grades. The sensible approach is to start with body style and seating or load requirements, then choose the variant whose price, transmission, drivetrain and equipment fit the weekly routine. That keeps the decision grounded in ownership reality rather than showroom appeal. The fairest verdict on the Honda Amaze is therefore use-case driven. It can be a strong South African choice when the buyer chooses the correct derivative for the intended mix of city driving, freeway work, passengers, cargo and rough-road exposure. It becomes less convincing when bought only for styling or badge appeal without checking the practical numbers and ownership costs that will matter after delivery.

City Driving	In city use the Amaze should be judged by visibility, parking effort, stop-start comfort and the way the available transmissions behave in traffic. A Sedan with a sensible seating position can make daily errands easier, but buyers should still check wheel size, camera availability and low-speed ride comfort on the exact derivative they intend to buy. For the Amaze, city use also means potholes, tight shopping-centre ramps, speed humps, heat-soaked traffic and short trips where fuel use can rise. The most comfortable derivative is the one that combines the right gearbox response, seating position and parking support with tyre sizes that do not punish everyday surfaces.
Highway	On longer South African routes the Amaze needs stable cruising manners, predictable overtaking and a cabin that does not become tiring after several hours. Published consumption references around 5.4 l/100km, 5.3, and 5.5 help frame running costs, while output references around 66 kW help explain overtaking confidence. Buyers who travel with passengers or cargo should compare the loaded feel and not rely only on solo test-drive impressions. A buyer who drives between provinces or carries family on holiday should also consider noise, seat support, spare-wheel arrangements, overtaking response and how confidently the vehicle holds speed when loaded. Those details often separate two trims that look similar on paper.

Off-Road	The Amaze is best treated as a road-biased vehicle for tar, suburban streets and occasional well-kept gravel. It can handle normal South African surface changes when driven sensibly, but buyers who regularly travel on sand, mud or rocky access roads should choose a purpose-built SUV or bakkie instead. Where rougher roads are part of ownership, the buyer should check tyres, underbody clearance, approach to traction control and recovery practicality before relying on the body style. If the route is mainly tar, comfort and running costs should take priority over unused off-road image.
Best For	The Honda Amaze suits drivers who prefer a booted car with composed road manners and clear ownership costs. It is strongest for buyers who already know the body format works for their parking, family, business or leisure needs, and who now need to choose the right derivative by monthly cost, transmission, equipment and practical capability. It is less suited to shoppers who only want the lowest advertised price without checking what changes between trims.

04 Variant Comparison Matrix

All 3 variants of the Honda Amaze side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.
