01 Overview & Quick Facts

Deliver 9 gives LDV South Africa a large panel van above the compact G10+. The finalized range contains three body choices: medium wheelbase with mid roof, long wheelbase with mid roof, and long wheelbase with high roof. All three use the same current drivetrain and core equipment, so buyers can choose around site access, cargo volume and payload without adding a second engine or transmission decision. The 1,996 cc turbo-diesel produces 128 kW at 3,500 rpm and 420 Nm from 1,500 to 2,400 rpm. It drives the rear wheels through an eight-speed ZF automatic. Eco and Power responses and engine stop-start are confirmed. The engine is Euro VI compliant and uses an 80-litre fuel tank plus a 20-litre AdBlue tank. LDV has not published a complete South African city, highway and combined consumption set for these exact bodies, so route cost must be established through a loaded fleet trial rather than a borrowed foreign figure. Body choice materially changes capacity. The medium-wheelbase mid-roof van is 5,546 mm long, has a 3,019 mm cargo floor and offers 9.66 cubic metres. The...

Body Style	Three-seat large panel van
Launched	2026
Generation	Current rear-wheel-drive large panel van with one diesel automatic specification across MWB and LWB bodies.
Fuel Types	Diesel
Colours	Blanc White and Mica Blue.

03 Pros, Cons & Buyer Summary

● STRENGTHS ✓ Three exact body choices ✓ Up to 12.33 cubic metres ✓ Up to 1,600 kg payload ✓ 128 kW and 420 Nm ✓ Eight-speed ZF automatic ✓ Three front seats	● CONSIDERATIONS ✗ Rear-wheel drive only ✗ No public exact fuel-consumption set ✗ Five-year or 100 ✗ 000 km service plan ✗ Large turning circle ✗ AdBlue operating requirement
---	--

Buyer Summary

"Three useful bodies share a strong, well-equipped automatic platform."

Deliver 9's strength is choice without mechanical confusion. MWB Mid Roof turns more easily, LWB Mid Roof maximises the published payload, and LWB High Roof maximises enclosed volume. All carry the same 128 kW diesel, ZF automatic, three-seat cabin and serious safety technology. The ownership case must include an optional service plan, AdBlue, shelving mass and real loaded fuel use. It is compelling for secured volume, but excessive for small urban consignments. The three variants therefore reward a cargo-first calculation rather than automatic selection of the largest shell.

City Driving	MWB Mid Roof is the natural urban starting point because its shorter body and 13-metre turning circle reduce yard pressure, although it remains a large van. Front and rear sensors, rear camera and automatic transmission support multi-stop work. Model the 9.66-cubic-metre bay around actual crates and shelving. Door-opening warning helps on busy streets, while the passenger-side slider still requires safe kerb orientation and a clear cycle path.
Highway	The 128 kW diesel and 420 Nm torque band are paired with eight ratios for regional loads. LWB bodies offer more floor length, and the Mid Roof carries the range's highest listed 1,600 kg payload. At motorway speed, mass, roof height and crosswinds affect fuel and stability. Weigh the completed van after shelving, count the trailer nose load within payload, maintain AdBlue supply and plan servicing around the first 5,000 km or six-month run-in requirement.
Off-Road	Deliver 9 is a rear-wheel-drive panel van, not an off-road derivative. It can reach firm industrial yards and maintained gravel when tyres, speed and load distribution are appropriate. Long overhangs, roof height and a loaded rear axle require caution over crests and ruts. No four-wheel drive, low range, wading rating or factory recovery claim is published for the local models. Difficult site access should be tested before body conversion and route commitment.
Best For	Deliver 9 serves couriers, field-service operations, mobile workshops and businesses moving bulky or heavy secured cargo. MWB prioritises manoeuvrability, LWB Mid Roof gives the highest listed payload, and LWB High Roof suits volume-led work where vertical access and loading conditions allow it.

04 Variant Comparison Matrix

All 3 variants of the Ldv Deliver 9 side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.
