01 Overview & Quick Facts

LDV launched the T60 Double Cab in South Africa in 2024 and has retained a deliberately broad ladder rather than one all-purpose derivative. The current official range contains ten combinations. Elite comes with rear-wheel drive or selectable four-wheel drive, and each axle layout offers a six-speed manual or six-speed automatic. Pro is four-wheel drive with the same two transmission choices. Max Pro and Max Luxe are also four-wheel-drive models, pairing their stronger twin-turbo diesel with either a six-speed manual or an eight-speed ZF automatic. That structure matters because grade, drivetrain and gearbox each change the ownership decision. Elite and Pro use a 2.0-litre single-turbo diesel rated at 120 kW and 375 Nm. Max Pro and Max Luxe move to a 2.0-litre twin-turbo diesel with 160 kW and 500 Nm. Elite and Pro list a 75-litre tank, while Max Pro and Max Luxe list 73 litres and three selectable engine responses labelled Power, Normal and Eco. The official sheets quote 9.3 litres per 100 km and also print a separate 7.9 urban figure; those labels are unusual enough that a buyer...

Body Style	Five-seat double-cab pickup with manufacturer-supplied load box
Launched	2024
Generation	Current South African ladder-frame T60 Double Cab with single-turbo and twin-turbo diesel grade families.
Fuel Types	Diesel
Colours	LDV publishes colour selectors on individual grade pages rather than one reliable consolidated matrix; confirm the chosen grade and paint on the order.

03 Pros, Cons & Buyer Summary

● STRENGTHS ✓ Ten exact drivetrain and gearbox combinations ✓ Two diesel output levels ✓ Factory double-cab load box ✓ Three-tonne braked towing rating ✓ Selectable low range on 4WD derivatives ✓ Useful grade progression	● CONSIDERATIONS ✗ Large urban footprint ✗ Payload varies by derivative ✗ Max Luxe payload is 750 kg ✗ No petrol option ✗ No electrified derivative in this range ✗ Manual and automatic payloads differ
---	---

Buyer Summary

"A broad, capable range that demands disciplined derivative selection."

The T60 Double Cab works best when its ten derivatives are viewed as distinct tools. Elite offers the simplest access point, Pro adds useful traction and cabin equipment, Max Pro supplies the stronger engine without every luxury item, and Max Luxe prioritises comfort while carrying less payload. The body, towing ceiling and ownership cover create a credible foundation. The important cautions are the large footprint, grade-specific payload, unusual consumption labelling and the cost of hardware that may never be used.

City Driving	In town, every T60 occupies the same 5.365-metre footprint, so parking space matters more than grade. Elite keeps replacement equipment simple, while Max Pro and Max Luxe add camera assistance that can reduce uncertainty around the tailgate. Automatic variants reduce clutch work in congestion. Drivers still need mirror discipline, pedestrian checks and space for the long wheelbase. Calculate daily payload with occupants and a canopy before assigning the remainder to tools or stock.
Highway	For intercity work, the 120 kW engine is adequate when loads and passing expectations are realistic, while the 160 kW bi-turbo provides more reserve for heavy touring or towing. The ZF eight-speed is available only with the Max engine, which may be the smoother long-distance pairing. Verify trailer mass, towball load and payload together, keep within the 3,000 kg braked limit and budget fuel from the exact derivative's operating conditions rather than the ambiguous printed consumption labels.
Off-Road	Elite 2WD is the road and firm-surface choice. Every other current T60 Double Cab derivative in this matrix is a selectable four-wheel-drive model with high and low ranges; Pro additionally lists a rear on-demand differential lock. The common 215 mm clearance and 500 mm wading figure published for most sheets are capability limits, not permission to enter water without checking depth, current, surface and recovery access. Tyres, payload and driver technique remain decisive.
Best For	The T60 Double Cab suits buyers who genuinely need rear seating and a factory load box in one vehicle. It covers fleet supervisors, tradespeople carrying a small crew, towing users and families who accept pickup dimensions. The ten-way choice rewards careful matching; buying by badge alone can add unused hardware or surrender payload.

04 Variant Comparison Matrix

All 10 variants of the Ldv T60 Double Cab side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.
