01 Overview & Quick Facts

The LEPAS L6 is the brand's next South African SUV and is positioned above the L4 with more space, a richer equipment brief and a stronger torque figure. Pre-orders are open for the internal-combustion model, but LEPAS South Africa has not yet published final retail pricing or a final local derivative matrix. That distinction matters: the vehicle is confirmed and reservable, while the exact value comparison remains preliminary. A refundable reservation secures priority allocation; it is not a final purchase agreement, a guaranteed delivery date or proof of a particular trim specification. Official July material now confirms a 1.5-litre turbocharged petrol engine producing 108 kW and 285 Nm. Earlier content that described the output as unpublished is therefore out of date. LEPAS has also listed 19-inch alloy wheels, a 13.2-inch touchscreen, wireless Apple CarPlay and Android Auto, heated and ventilated front seats, a panoramic sunroof and a powered tailgate among the launch features. The assistance package is described as 22 Level 2 functions and includes named systems such as autonomous emergency braking, lane-keeping assistance and adaptive cruise control. A 540-degree...

Body Style	Mid-size SUV
Launched	2026
Generation	First-generation LEPAS L6 mid-size SUV in South African pre-launch and pre-order phase

03 Pros, Cons & Buyer Summary

● STRENGTHS ✓ Confirmed 108 kW and 285 Nm turbo engine ✓ Pre-orders open through the local network ✓ 22 Level 2 assistance functions announced ✓ 540-degree HD surround-view camera ✓ 13.2-inch infotainment display ✓ Wireless Apple CarPlay and Android Auto	● CONSIDERATIONS ✗ Final retail price is unpublished ✗ Final derivative matrix is unpublished ✗ Final transmission detail is still pending ✗ No complete South African specification sheet ✗ Official consumption is not yet published ✗ Final luggage capacity is not yet published
---	---

Buyer Summary

"A promising equipment-rich petrol SUV whose value cannot be judged responsibly until final price, derivative and homologation data are published."

The LEPAS L6 now has enough official detail to be more than a vague future model. Its 108 kW/285 Nm turbo engine, 22-function assistance claim, 540-degree camera and strong cabin-equipment list create a credible pre-launch proposition. The unresolved price is decisive, however, because value depends on what that equipment costs relative to established alternatives. The refundable pre-order structure reduces reservation risk but does not remove the need for a written final specification. Interested buyers can reasonably hold a place in the queue, provided they preserve the right to walk away if price, delivery timing, luggage space, consumption or exact trim content does not suit them.

City Driving	The confirmed surround-view camera, parking perspective and assistance features should suit dense urban use, while the 13.2-inch interface and wireless phone integration address daily convenience. Heated and ventilated front seats are notable for a vehicle in this positioning. Urban buyers still need the final width, turning figure, official consumption and gearbox specification. A demonstration should include parking ramps, crawling traffic and a steep pull-away so the driver can judge manoeuvrability and low-speed calibration rather than relying on an equipment list.
Highway	A 285 Nm torque figure suggests useful mid-range response for joining fast traffic and carrying passengers, but 108 kW must be considered alongside the vehicle's final kerb mass and transmission. Adaptive cruise control and lane assistance could reduce workload on long journeys when used responsibly. Before treating the L6 as a touring choice, buyers should verify luggage volume, spare-wheel provision, tank capacity, official consumption, tyre replacement cost and the exact driver-monitoring behaviour. None of those ownership checks is replaced by a pre-order reservation.
Off-Road	The L6 has SUV styling and an underbody-view camera function, but the current South African launch material does not establish low-range gearing, all-wheel drive, wading depth, protective hardware or an exact ground-clearance figure. It should therefore be assessed as a road-focused vehicle until the final derivative sheet proves otherwise. Maintained gravel suitability will depend on tyre profile, clearance and suspension tuning. Buyers needing repeated sand, mud, rocky tracks or remote travel should wait for confirmed capability data and recovery provisions.

Best For

The L6 is aimed at a household or professional buyer who wants more cabin presence and equipment than the compact L4 and is comfortable waiting for a binding South African price and derivative sheet. It may appeal to technology-focused drivers who value a surround-view camera, adaptive assistance and front-seat comfort. It is not yet suitable for a buyer who must lock down a finance payment, luggage requirement or delivery date immediately, because several decisive commercial and technical details remain unpublished.

04 Variant Comparison Matrix

All 1 variants of the LEPAS L6 side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.
