01 Overview & Quick Facts

The Lexus NX occupies a specific place in the South African range: it is designed for a premium family-SUV buyer who wants a manageable footprint and a real choice between petrol, hybrid and plug-in-hybrid ownership. The current range contains 5 confirmed derivatives, priced from R1 074 200 to R1 428 700. Those figures are recommended vehicle prices checked on 2026-07-17; finance interest, registration, insurance, paint, dealer accessories and optional plans can change the amount a buyer ultimately pays. The derivative list is NX 450h PHEV, NX 350h F SPORT, NX 350h SE, NX 350h EX, NX 350 F SPORT. Reading that list as a price ladder is more useful than treating every version as the same vehicle, because powertrain, drivetrain, seating, tyres and cabin equipment can alter both the weekly experience and the ownership budget. The NX 350 F SPORT uses a 2.4-litre turbo petrol engine and eight-speed automatic. NX 350h grades use a 2.5-litre self-charging hybrid and CVT, while the NX 450h+ adds plug-in capability for owners who can charge consistently. This engineering spread should define the shortlist before...

Body Style	SUV
Launched	2023
Generation	Second-generation Lexus NX mid-size luxury SUV
Fuel Types	Petrol, Hybrid and Plug-in Hybrid

03 Pros, Cons & Expert Verdict

● STRENGTHS ✓ Current South African derivative and price coverage ✓ Clear powertrain and trim choices ✓ Detailed derivative specifications ✓ Buyer role is easy to define ✓ Strong safety and convenience coverage ✓ Useful city and highway ownership fit	● CONSIDERATIONS ✗ Upper grades materially increase finance cost ✗ Tyre and insurance costs vary by derivative ✗ Real energy use changes with route and load ✗ Optional equipment can obscure base price ✗ A short showroom route is not enough ✗ The flagship is not automatically best value
--	--

Expert Verdict

"Choose the NX by required capability and total ownership cost, then select the trim."

The Lexus NX is convincing when the chosen derivative solves a defined ownership problem. Start with the correct body and powertrain, compare neighbouring grades at the same finance assumptions, and pay extra only for capability or equipment that will be used repeatedly. The price range of R1 074 200 to R1 428 700 is broad enough that a disciplined trim decision matters.

City Driving	In city use, The NX is large enough for family use without becoming cumbersome in shopping-centre ramps. Hybrid grades suit stop-start traffic, while the PHEV only delivers its strongest running-cost case when the owner can recharge at home or work. Parking dimensions, camera coverage, low-speed ride and transmission response should be tested on familiar roads. Heat, potholes, steep ramps and short trips can expose a poor derivative choice more quickly than a smooth demonstration route.
Highway	On South African highways, For intercity travel, compare output, tyre size and seat specification rather than choosing only by powertrain badge. The turbo petrol brings direct response, the hybrid balances range and economy, and the PHEV can preserve charge for urban sections. A useful test includes a merge, an overtake and rough tar at cruising speed with realistic passenger load. Seat support, wind noise, spare-wheel provision and range between fuel or charging stops deserve equal weight with peak output.
Off-Road	For gravel and rough-road use, The NX can manage maintained gravel and poor tar, but it remains a road-focused luxury SUV. Its all-wheel-drive derivatives add traction; they do not replace low range, underbody protection or all-terrain tyres. Buyers should distinguish occasional maintained gravel from genuine off-road work. Tyre construction, sidewall depth, driven wheels, underbody exposure and recovery access are more meaningful than SUV styling or an adventurous trim name.
Best For	The Lexus NX best suits a premium family-SUV buyer who wants a manageable footprint and a real choice between petrol, hybrid and plug-in-hybrid ownership. It rewards a buyer who defines passenger, route, luggage, charging, towing and terrain needs before choosing a trim. It is less suitable when selected mainly for badge or styling without a realistic running-cost and space check.

04 Variant Comparison Matrix

All 5 variants of the Lexus NX side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.
