01 Overview & Quick Facts

The Suzuki Dzire occupies a space in the South African market that very few manufacturers are willing to fill: an affordable, practical compact sedan from a Japanese brand with a genuine track record for reliability. At R229,900 for the entry GA 5-speed manual, the Dzire undercuts every comparable sedan in the country and does so without the compromises that usually accompany a price-leader position. The engine is the same 1.2-litre Z12E DualJet unit used in the fifth-generation Swift — a three-cylinder naturally aspirated petrol that produces 60kW at 5,700rpm and 112Nm at 4,300rpm. The DualJet technology fires two injectors per cylinder in an alternating sequence, improving combustion completeness at part-load — the condition that represents the majority of SA urban driving. The result is a claimed fuel consumption figure of 4.4 litres per 100km on the manual and 4.6 on the CVT; real-world SA measurements consistently track 1.0 to 1.5 litres higher in city conditions, giving owners a realistic 5.5 to 6.5L/100km in Joburg and Cape Town peak-hour traffic. That figure is meaningfully lower than any comparable 1.5-litre naturally aspirated...

03 Pros, Cons & Expert Verdict

● STRENGTHS

- ✓ Reliability is demonstrated through proven engineering and market operation.
- ✓ Service costs remain reasonable through dealer and independent networks.
- ✓ Fuel economy sits within realistic ranges for segment class.
- ✓ Interior space accommodates family use across most configurations.
- ✓ Resale values develop as market recognizes vehicle positioning.
- ✓ Safety features include modern systems addressing real-world hazard scenarios.

● CONSIDERATIONS

- ✗ Depreciation follows segment patterns, with steeper loss during initial ownership years.
- ✗ Interior materials prioritize function over premium perception.
- ✗ Styling appears understated compared to visually aggressive competitors.
- ✗ Technology features may lag premium competitors in sophistication.
- ✗ Off-road capability remains basic for adventure-focused buyers.
- ✗ Hard plastic dashboard finish and basic seat material communicate the entry-level price...

Expert Verdict

"The most affordable, fuel-efficient and complete compact sedan in South Africa under R275,000 — a rational choice that is hard to argue against."

The Dzire GL+ CVT at R272,900 is the definitive rational sedan purchase in South Africa in 2026. Nothing else at this price delivers this combination of fuel economy (real-world 5.5 to 6.5L/100km city), safety equipment (AEB, lane departure warning, 6 airbags), active safety technology, and a 378-litre boot from a brand with a well-documented SA reliability record. The main competitor, the Honda Amaze 1.2 Comfort CVT, is similarly specced but priced approximately R30,000 to R40,000 higher. The VW Polo Sedan entry specification at comparable pricing offers fewer safety features. Buyers who need a sedan — rather than a hatchback — and want the lowest possible purchase price and running costs should shortlist the Dzire GL+ CVT above all else.

City Driving

The Dzire is specifically engineered for urban conditions. The Z12E DualJet's immediate torque delivery from below 2,000rpm gives confident pull-away in peak traffic without the lurching of older small engines. The compact 3,995mm length makes urban lane-change manoeuvres manageable, and the high-roof sedan posture provides excellent forward visibility for judgment in tight city conditions. GL+ CVT city fuel consumption averages 5.5 to 6.5L/100km in SA conditions — lower than competitors using conventional injector systems. The CVT gearbox's behaviour in city driving is predictably smooth: it does not hunt between ratios in crawling traffic and does not lunge when the gap opens. Parking is straightforward, and the GL+ rear camera removes most reverse anxiety. Daily Joburg or Cape Town CBD commuters will find the Dzire one of the lowest-stress, lowest-cost sedans available in its price bracket.

Highway

At 120km/h on the N3, the GL+ CVT keeps the Z12E engine at around 2,400rpm in its highest drive ratio — an engine speed where cabin noise is present but not fatiguing over a two-hour drive. Highway fuel consumption drops to around 4.5 to 5.0L/100km, a genuinely low figure for a naturally aspirated petrol sedan. The car's short 2,450mm wheelbase means it does not have the planted, large-car feel that a Corolla Sedan or Polo Sedan offer at high speed — but the 940kg kerb weight keeps it stable in crosswinds and the front MacPherson suspension tracks motorway lane markings without requiring constant correction. For regular 300km Joburg-to-Bloem or Cape Town-to-Paarl journeys, the Dzire is a capable and economical choice that makes more financial sense than a larger sedan at this distance.

Off-Road	The Dzire is a conventional FWD sedan with 145mm of ground clearance — appropriate for South Africa's urban and suburban road network and nothing beyond. It handles suburban gravel driveways, light dirt roads leading to guesthouses, and moderate speed bumps without difficulty. It is not suitable for farm tracks, corrugated gravel roads, or river crossings. Buyers who need any off-road capability should look at the Fronx or Grand Vitara rather than the Dzire.
Best For	First-time car buyers upgrading from a used hatchback, small families needing practical boot space, single-income households wanting the most reliable and fuel-efficient sedan under R275,000, small business owners needing a commuter vehicle with low running costs
