01 Overview & Quick Facts

The Suzuki Jimny 5-door answers the question that every two-door Jimny buyer has been asking since the fourth generation launched: can I have the Jimny's off-road character and AllGrip Pro four-wheel-drive in a body that fits my family? The answer arrived in South Africa in 2025, priced from R439,900, and the changes from the standard two-door model are exactly what was needed and nothing more. Suzuki did not soften the Jimny's core engineering to add the two extra doors — the K15B 1.5-litre engine, the part-time AllGrip Pro 4x4 system with high and low range, the ladder-frame chassis, and the 210mm ground clearance are all carried over unchanged. What changes is the body: stretched 360mm longer at 3,985mm overall, with a full-height rear door on each side, a proper third row of headroom for rear passengers, and a boot that grows from 85 litres (seats up, two-door) to 332 litres (seats up, five-door). This is not a cosmetic revision. The 85-litre two-door boot was the most cited practical objection to the Jimny as a daily vehicle — luggage for two...

03 Pros, Cons & Expert Verdict

● STRENGTHS

- ✓ Reliability is demonstrated through proven engineering and market operation.
- ✓ Service costs remain reasonable through dealer and independent networks.
- ✓ Fuel economy sits within realistic ranges for segment class.
- ✓ Interior space accommodates family use across most configurations.
- ✓ Resale values develop as market recognizes vehicle positioning.
- ✓ Safety features include modern systems addressing real-world hazard scenarios.

● CONSIDERATIONS

- ✗ 6.4 to 6.7L/100km claimed fuel consumption climbs to 8.0 to 10.5L/100km in real SA city...
- ✗ Interior materials prioritize function over premium perception.
- ✗ Styling appears understated compared to visually aggressive competitors.
- ✗ Technology features may lag premium competitors in sophistication.
- ✗ R489,900 for the GLX AT places it R108,000 above the Grand Vitara GL MT — buyers who...
- ✗ No diesel option — the K15B petrol's fuel consumption in city conditions is the primary...

Expert Verdict

"The answer to five years of Jimny buyer complaints about rear seats and boot space — same legendary 4x4 DNA in a package that actually works for families."

The Jimny 5-door GLX AT at R489,900 is simultaneously the most off-road capable and the most family-practical vehicle available in South Africa under R500,000. No other vehicle at this price offers a ladder-frame chassis, genuine low-range 4x4, 210mm clearance, five usable seats, and a 332-litre boot. The GLX specification's 6 airbags, AEB, and wireless CarPlay place it well above minimum safety and connectivity requirements. The automatic gearbox is the right choice for buyers who mix urban commuting with weekend off-road use — the 4-speed torque converter manages both demands without driver fatigue. Buyers who are primarily off-road drivers should choose the manual: greater control in 4L low range and no torque converter slip on technical terrain are genuine advantages.

City Driving

The five-door Jimny handles city driving more comfortably than the two-door — the longer wheelbase and additional rear seat access make it a genuine daily driver for a family. At 3,985mm it is not a compact city car, but it is substantially smaller than a Fortuner or Everest. Urban fuel consumption of 8.0 to 10.5L/100km is the primary practical limitation — this is a body-on-frame 4x4 with a 75kW engine, and it is not economical in stop-start traffic. The AllGrip Pro system runs in 2H on tar roads, and the electric power steering makes city driving considerably lighter than the feel of the ladder frame might suggest. Parking requires more attention than a conventional hatchback but the 15-inch wheels and short-ratio steering make low-speed manoeuvring manageable.

Highway

At 120km/h on SA national roads the K15B sits at around 3,200rpm — audible but not unpleasant for a vehicle with this drivetrain character. The Jimny 5-door does not have the planted, highway-smooth feel of a unibody SUV — the ladder frame transmits more road surface information to occupants, and wind noise around the upright windscreen is present at speed. For journeys under two hours, this is a non-issue. For buyers who regularly cover 300km-plus legs at highway speeds, the five-door Jimny requires the same mindset adjustment as any body-on-frame 4x4: it is not a long-distance GT, it is a capable dual-purpose vehicle. Highway fuel consumption drops to around 7.0 to 8.5L/100km.

Off-Road

The Jimny 5-door is the most off-road capable five-seat vehicle under R500,000 in South Africa. The AllGrip Pro system's 4L low range provides a reduction ratio ideal for rock climbing, steep descents, and loose surface recovery. 210mm ground clearance, rigid front and rear axles with coil springs, 36-degree approach angle, and 49-degree departure angle give the five-door performance on technical terrain that crossover AWD systems simply cannot match. The longer body marginally reduces approach angle compared to the two-door, but the practical off-road capability remains class-leading at this price. Underbody skid plates protect the drivetrain from rock contact. Front and rear recovery hooks are standard for recovery-strap attachment.

Best For

Families who previously dismissed the two-door Jimny as too small for daily use, off-road enthusiasts who need five seats and genuine cargo space, buyers in the R439,000 to R490,000 range wanting body-on-frame 4x4 capability, buyers who occasionally need low-range 4x4 for farm access or off-road driving clubs
