01 Overview & Quick Facts

The Suzuki Jimny is the dedicated off-road vehicle — a compact, purpose-built 4x4 that's genuinely capable on challenging terrain while remaining manageable in cities. At R449,900 for the GLX AllGrip MT base variant, it targets enthusiasts and professionals needing actual off-road ability, not just SUV styling. The 1.5-litre four-cylinder is the same engine — 77 kilowatts, 138 Newton-metres, proven and straightforward. In the Jimny's light 1,050-kilogram frame, this engine feels responsive and eager. The five-speed manual on MT variants offers direct control for off-road situations; the automatic AT uses traditional automatic for convenience. Real-world fuel consumption is 5.8 to 6.4 litres per 100 kilometre, slightly higher than sedans due to boxy aerodynamics and 4WD system. The permanent all-wheel drive with low-range gearbox is the Jimny's core capability. Low-range reduction allows crawling at very low speeds with high torque available, essential for rocky terrain, water crossings, and steep gradients. Differential locks are available on higher trims, locking front and rear axles for maximum traction in extreme situations. Real-world off-road use shows the Jimny capable of terrain requiring professional recovery for most...

03 Pros, Cons & Expert Verdict

● STRENGTHS	● CONSIDERATIONS
<ul style="list-style-type: none"> ✓ Reliability is demonstrated through proven engineering and market operation. ✓ Service costs remain reasonable through dealer and independent networks. ✓ Fuel economy sits within realistic ranges for segment class. ✓ Interior space accommodates family use across most configurations. ✓ Resale values develop as market recognizes vehicle positioning. ✓ Safety features include modern systems addressing real-world hazard scenarios. 	<ul style="list-style-type: none"> ✗ Depreciation follows segment patterns, with steeper loss during initial ownership years. ✗ Interior materials prioritize function over premium perception. ✗ Styling appears understated compared to visually aggressive competitors. ✗ Technology features may lag premium competitors in sophistication. ✗ Off-road capability remains basic for adventure-focused buyers.

Expert Verdict

"Nothing in SA under R700,000 offers genuine off-road capability close to the Jimny — if you need it, there is no real alternative"

The Jimny MT at R549,900 makes its case through a single comparison: what does the nearest alternative ladder-frame 4x4 with low-range cost? The Toyota Land Cruiser 76 station wagon starts at over R900,000. The Land Rover Defender 90 starts at R1.2 million. The Ford Bronco is not officially sold in SA. The Jimny offers the same fundamental architecture — ladder frame, live axle, transfer case with low-range — for R549,900 in a package that parks in a standard bay and pays mid-range insurance premiums. For buyers who need genuine off-road capability and cannot allocate R900,000 or more to a vehicle, the Jimny is not a compromise. It is the correct answer.

City Driving	The Jimny functions in city conditions but makes no pretence of being optimised for them. The live rear axle produces a different ride character to car-based crossovers — more vertical movement over speed humps and road joins, more driver awareness of the road surface. The 3-door body means accessing the rear seat requires the front occupant to lean the seat forward — acceptable for occasional rear passengers, tiring for daily use with regular rear occupants. Turning circle is tight given the compact 3.5m body. Fuel consumption in city conditions averages 9 to 11L/100km.
Highway	Adequate but not refined at national road speeds. The boxy body produces wind noise above 100km/h, and the K15B at 120km/h in the manual's fifth gear runs at approximately 3,400rpm — audible and present in the cabin. The Jimny is stable and predictable at highway speeds but it is not a comfortable long-distance cruiser in the way that a conventional SUV is. Buyers who drive 400km highway legs regularly will find the Jimny tiring. Buyers who drive 60km to work each day and use the Jimny for weekend and farm use will find the highway compromise entirely tolerable.

Off-Road	This is the Jimny's reason for existing. In 4L low-range, the AllGrip Pro system provides the gear reduction and axle lock engagement for technical off-road terrain that crossovers cannot replicate at any price. Approach angle of 37 degrees, departure angle of 49 degrees, and 210mm ground clearance allow the Jimny to navigate terrain that stops heavier, longer SUVs. The compact 3.5m body fits tracks and gaps that longer vehicles cannot access. Rocky mountain passes, deep mud ruts, steep descents on loose shale — the Jimny handles all of it in the hands of a competent driver with appropriate tyres fitted.
Best For	Genuine off-road enthusiasts who use capability regularly, farm and estate owners needing compact 4x4 access, adventure and overlanding buyers who want a vehicle that fits narrow tracks, comparison shoppers who have priced the Defender 90 and Land Rover Discovery Sport and want the same capability for a fraction of the cost
