01 Overview & Quick Facts

The Suzuki XL6 is the three-row SUV, positioned above the Ertiga with higher ground clearance and more robust styling while sharing the same fundamental three-row platform. At R499,900 for the GL MT base variant, it targets families wanting seven-seat capacity with SUV character and slightly more modern features than the Ertiga. The 1.5-litre four-cylinder is the same engine as the Ertiga — 77 kilowatts, 138 Newton-metres, proven and straightforward. In the heavier XL6 (1,200 kilograms), power feels adequate rather than brisk, but the engine handles the weight without strain. Real-world fuel consumption is 5.7 to 6.3 litres per 100 kilometre depending on loading and driving patterns. Fully loaded with seven passengers and luggage, consumption reaches 6.5–7.0 L/100km. Highway with light loading achieves 5.5–5.7 L/100km. City reaches 6.3–7.0 L/100km. The engine is durable; the three-row SUV platform creates no mechanical complications. Ground clearance of 200 millimetres is adequate for graded gravel and farm access, though the XL6's higher weight means clearance is used more conservatively than lighter vehicles. The engineering intent is tarmac and light gravel, not serious off-road. The compact...

03 Pros, Cons & Expert Verdict

<p>● STRENGTHS</p> <ul style="list-style-type: none"> ✓ Reliability is demonstrated through proven engineering and market operation. ✓ Service costs remain reasonable through dealer and independent networks. ✓ Fuel economy sits within realistic ranges for segment class. ✓ Interior space accommodates family use across most configurations. ✓ Resale values develop as market recognizes vehicle positioning. ✓ Safety features include modern systems addressing real-world hazard scenarios. 	<p>● CONSIDERATIONS</p> <ul style="list-style-type: none"> ✗ Depreciation follows segment patterns, with steeper loss during initial ownership years. ✗ Interior materials prioritize function over premium perception. ✗ Styling appears understated compared to visually aggressive competitors. ✗ Technology features may lag premium competitors in sophistication. ✗ Off-road capability remains basic for adventure-focused buyers.
---	---

Expert Verdict

"The Ertiga's premium sibling earns its price premium through captain's chairs that change the daily experience for second-row adult passengers"

The XL6 justifies its R70,000 premium over the Ertiga GL AT in exactly one scenario: a family that regularly carries adult passengers in the second row on journeys longer than 30 minutes. For that buyer, the captain's chairs, walk-through access, and improved interior quality make the XL6 the correct choice without hesitation. For a family that primarily fills all three rows with children, the Ertiga's 7-seat capacity and lower price are the correct answer. The buying decision is binary and rarely ambiguous once you know your use case.

City Driving	Urban driving reveals competent engineering. Visibility is adequate for metropolitan traffic navigation. Parking assistance systems help genuinely in tight spaces. Air conditioning operates properly in South African summer heat. The driving position commands authority without excessive height. Interior layout remains intuitive through extended city driving. Audio systems integrate smartphone connectivity. Climate control maintains comfort in traffic-heavy commutes. Steering is responsive enough for urban maneuvers. Fuel consumption in city traffic remains predictable and manageable. The vehicle functions reliably through daily metropolitan use, delivering comfort during extended urban residence.
Highway	Highway driving confirms engineering integrity. At 120 km/h cruising, engine operation is relaxed and refined. Road noise remains controlled through wind and tire sound management. Fuel economy stabilizes within predictable consumption ranges. The transmission settles into efficient cruising operation. Comfort extends across multi-hour driving periods. Seating provides proper support without requiring frequent adjustment. Climate control maintains consistent cabin temperature. The ride quality balances bump compliance with directional stability. Highway safety systems function predictably without intrusive interventions. Extended highway driving confirms the vehicle's suitability for regional travel between major centers.

Off-Road	Off-road access ranges from basic to moderate depending on configuration. Ground clearance handles typical farm gates and low obstacles. Gravel roads present no challenge for standard variants. Basic farm tracks are traversable for most configurations. Rough terrain requires appropriate driving technique rather than extreme capability. The vehicle functions adequately for recreational off-road scenarios without specialization for rock crawling.
Best For	Families of 5 or 6 who regularly carry adults in the second row, buyers wanting MPV practicality with individual passenger comfort, corporate buyers who transport clients and cannot use a minibus, buyers comparing the XL6 against the Hyundai Staria's price at more than double
