01 Overview & Quick Facts

Small dimensions can be a real convenience, not a compromise to apologise for. A car that is easier to place in a narrow parking space may suit a Kampala working week better than an SUV bought mainly for its appearance. Suzuki Uganda's New Swift is a five-door, five-seat hatchback, and its appeal starts with that straightforward role: moving people and everyday belongings without taking up more space than necessary. The current local Swift needs to be distinguished from the preceding model. Suzuki Uganda's named GL+ and GLX profiles use a 1,197 cc three-cylinder petrol engine and CVT, with a body listed at 3,860 mm long. An older four-cylinder Swift brochure or a review of a hybrid sold elsewhere cannot supply missing specifications for this car. The generation, engine and gearbox should all appear on a useful quotation. GL+ and GLX are not simply two spellings for the same equipment package. The local GL+ table lists manual air conditioning, fabric upholstery, a seven-inch touchscreen, a rear camera and rear parking sensors. The GLX table provides its own mechanical and tyre details,...

Body Style	Hatchback
Generation	Current Uganda New Swift: 3,860 mm five-door body and three-cylinder 1,197 cc engine. Previous-generation four-cylinder and overseas hybrid specifications are not substituted.
Fuel Types	Petrol

03 Pros, Cons & Buyer Summary

● STRENGTHS ✓ Compact five-door body supports everyday urban practicality. ✓ GL+ and GLX CVT derivatives are named in the Uganda catalogue. ✓ Rear camera and parking sensors are documented for GL+. ✓ Current-generation engine identity is distinct from the older Swift. ✓ Local manufacturer warranty terms are published.	● CONSIDERATIONS ✗ Rear-seat and luggage suitability depend on the household's actual needs. ✗ Published GLX equipment detail is less complete than the GL+ table. ✗ 145 mm clearance requires care on damaged access roads. ✗ Old-generation and overseas hybrid economy claims do not describe this local... ✗ A higher grade name alone cannot establish its full safety package.
---	--

Buyer Summary

"A purposeful compact hatchback when the current-generation cabin, CVT and exact local grade fit the buyer."

New Swift earns attention through a clearly defined everyday role. Its compact five-door body and locally named automatic derivatives make it relevant to buyers who do not need a larger vehicle merely to complete ordinary journeys. The most useful next step is a direct GL+ and GLX comparison based on the cars being quoted, since the public tables do not describe both equipment packages equally. Passenger fit, luggage space and safe access to the normal parking area should decide suitability. A favourable first impression matters, but it should be backed by that practical check.

City Driving	Try the Swift where compactness will actually help: a narrow parking entrance, a busy shopping stop or a regular school run. Check whether the driver can judge the front corners and see clearly when reversing. GL+ has locally documented rear camera and sensor equipment, but visibility still needs the driver's attention. Use the demonstration to assess CVT response in gentle stop-start driving and whether the seat and steering adjustments suit the person using the car.
Highway	A small car can be considered for longer journeys without pretending that its cabin or engine has the same brief as a large touring SUV. Take the usual passengers for a representative drive and assess seating, luggage and conversation at an ordinary cruising speed. Leave sensible margins for acceleration when the car is loaded. Fuel planning should use a credible consumption figure for this generation and transmission, not an economy claim copied from a different Swift powertrain.
Off-Road	Swift is a road-going hatchback, not a vehicle to choose for deeply rutted tracks or unpredictable crossings. Its published clearance is a reason to inspect steep driveways and damaged access roads with care. A short, maintained gravel approach should be considered on its own condition rather than grouped with every kind of unpaved route. Avoid loading or driving practices that reduce clearance unnecessarily, and choose another type of vehicle if difficult access is part of the normal journey.
Best For	New Swift suits a first-time new-car buyer, a commuter or a smaller household that values a compact footprint and automatic operation. It deserves a practical trial for passengers and luggage, especially if it will be the household's only vehicle rather than a second car used mainly around town.

04 Variant Comparison Matrix

All 2 variants of the Suzuki New Swift side-by-side. Use this to spot the smallest differences quickly — fuel, power, gearbox and price all in one view.

SPEC	SWIFT GL+ 5D 1197p CVT	SWIFT GLX 5D 1197p CVT
